EDUCATION

Motilal Nehru National Institute of Technology

Bachelor of Technology

Uttar Pradesh, India

June 2019 – June 2023

EXPERIENCE

Software Development Engineer

Amazon

May 2024 – Present

Bangalore, India

- **LangForge Automation (Alexa AI AIDo Frugal Frontrunner Award):** Led end-to-end development and rollout of LangForge Automation, reducing CET failure rates from 60% to 0% for onboarded expert teams and saving 260Hr of effort across 60+ teams. Owned and maintained LangForgeSDK, resolving 100% of reported issues
- **Pattern Match i18n Expansion:** Enabled Pattern Match support for multi-locale Alexa+ expansion by implementing end-to-end context-based FST binary building and filtering across 4 services. Introduced locale-based binary separation to reduce binary load and search time, enabling Pattern Match in DUB/PDX via S3 replication.
- **Clarity Platform Development:** Contributing to centralized platform providing Classic Alexa (CA) NLU signals (NIF) to Banyan, enabling deterministic inference for predictable patterns to improve accuracy, latency, and capacity usage. Contributed to LLD and handling complexity of end-to-end implementation strategy and service dependencies.
- Led the migration of 9 microservices from JDK8 to JDK17, leveraging modern Java features to simplify codebase and reduce compute costs by 15%.
- **Technology Used:** Java, AWS, DynamoDB, S3, FST, Microservices architecture, CDK, Deployment Safety tooling.

Software Engineer

nFolks Data Solutions

Oct. 2023 – April 2024

Remote, India

- Built a parallel processing framework leveraging multi-threading, improving database retrieval speeds by 68%.
- Optimized data frames for large-scale processing and analytics, enhancing system performance.
- **Technology Used:** Python, Flask, REST-API, Jenkins, SQL.

Software Development Intern

Phyt Health

Jan. 2022 – March 2022

Pune, India

- Developed an AI-guided fitness app with real-time posture correction and exercise tracking, piloted by 500+ early users with 4.2 average feedback.
- Implemented real-time video conferencing for direct physiotherapist-patient interaction and support.
- **Technology Used:** JavaScript, Node.js, React.js, Babel, TensorFlow, and Twilio API, C++.

ACHIEVEMENTS

Alexa AI AIDo Frugal Frontrunner Award (2025) – Recognized for LangForge Automation.

Extra Mile Award (2025) – Amazon recognition for exceptional customer obsession and delivery excellence.

Technex2020 – Top 3 Finisher at IIT BHU TECHNEX2020 in Maze Explorer.

Prosang2023 – Winner, Project Exhibition Prosang2023 at MNNIT Allahabad.

MongoDB Certification (2023) – MongoDB Specialization (MongoDB, Inc).

TECHNICAL SKILLS

Strongest Area: Data Structure & Algorithm, C/C++, Java

Languages: Java, Python, SQL, JavaScript, TypeScript, C#, C++20

Frameworks: Node.js, ReactJS, Flask, .NET, REST APIs, GraphQL

Technologies: Git, Docker, Jenkins, AWS, Azure, REST APIs, Event-driven architectures

Libraries: pandas, NumPy, Matplotlib, TensorFlow

Database: MySQL, MongoDB, Redis

Full-Stack: React, TypeScript, Node.js, Java, C#, .NET, REST/GraphQL APIs, Scalable Data Models

Backend: Java, Node.js, C#, .NET, AWS, Azure, Event-Driven Architectures, High-Scale Distributed Services

Client: C++20, Native Windows/macOS Development, Platform-Specific Frameworks

Additional Skills: Strong problem-solving abilities, CI/CD Pipelines, Automation scripting, familiarity with cloud infrastructure and distributed systems.
